In February 2022 the Company's Management Board had initially resolved to undertake a programme of share buybacks (Buyback Programme) of Deutsche Post AG for up to 50 million shares at a total purchase price of up to €2 billion. The repurchased shares will either be retired, used to service long-term executive remuneration, employee share offerings or to meet possible obligations under potential future convertible bonds.

As part of the 9th tranche, which started on December 1, 2025, around 5.42 million shares with a total volume of around €250 million were repurchased. This tranche will be concluded at the end of April 1, 2026.

independent trade and the highest current independent bid in the trading venues where the purchase is made.

2. With regard to trading volume, the Company will not purchase more than 25% of the average daily volume of its shares on the trading venue in which the purchase takes place. The daily average volume of the shares will be based on the average of the previous 20 daily trading volumes.
