- Parcel Germany continues strong trajectory with ongoing slightly negative pricing/mix effects

- International expansion continues at good pace as we build out our networks in strongly growing ecommerce markets outside Germany

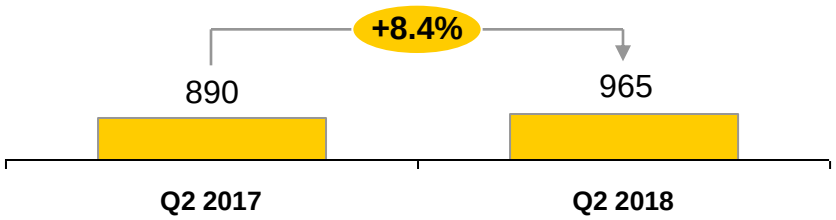
EXPRESS

EXPRESS: UNCHANGED STRONG TDI DEVELOPMENT

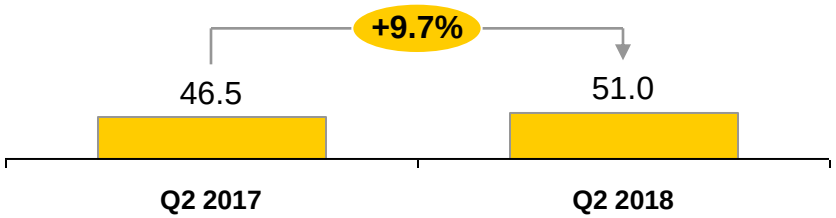
Deutsche Post DHL Group

Time Definite International (TDI)

Shipments per day '000s



Revenues per day[1] in € m



- TDI shipment/day growth remains well diversified with all regions contributing: Europe +11.1%, MEA +9.6%, Americas +8.8% and APAC +4.3%
- Yield management and yoy higher fuel surcharge drive stronger revenue vs shipment/day growth
- Order for 14 Boeing 777 signed, in line with intentions announced at May CMD:

- € 0.2bn incremental capex in 2018
- Significant operating and financial benefits: EBIT margin accretion of 50 bps upon completion of program
- Whilst impacting capex and FCF, debt-financing means no impact on Group excess liquidity considerations

1) Currency translation impacts are eliminated. Data aggregated with same currency rate

EXPRESS – DIVISIONAL RESULTS Q2 2018

Deutsche Post DHL Group

€ m	Q2 2017	Q2 2018	Chg.	Management comments

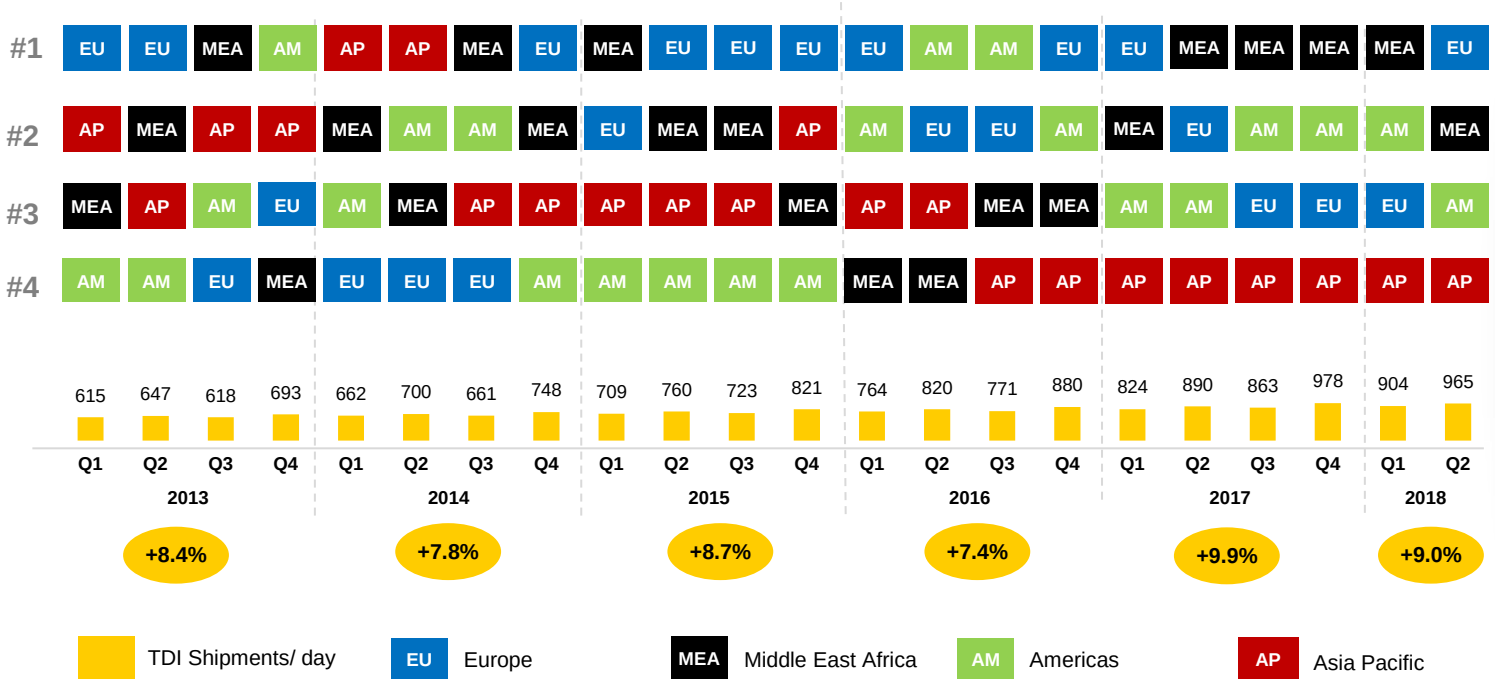
EBIT	469	517	+10.2%	Strong operating performance given that IFRS16 benefit was more than offset by significant FX headwind. Margin up +30bps to 12.8%
Operating Cash Flow	542	753	+38.9%	Excl. IFRS16 effect (€ 169m), strong OCF reflects excellent operating performance
Capex	130	218	+67.7%	Strong yoy increase mainly driven by first installment related to Boeing 777 order

EXPRESS GROWTH SUPPORTED BY BALANCED GLOBAL FOOTPRINT

Deutsche Post DHL Group

Quarterly growth ranking, TDI volume growth



- Consistent strong volume growth in global TDI network
- Constant variation in regional patterns reflects movements in global trade flows

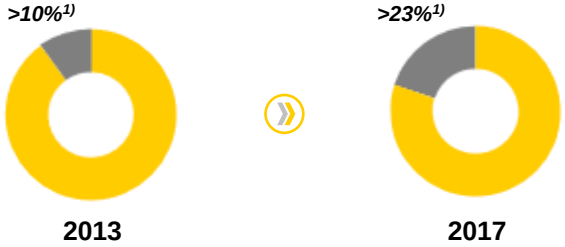
E-COMMERCE IS A PROFITABLE GROWTH DRIVER FOR DHL EXPRESS

Deutsche Post DHL Group

Portion of B2C TDI shipments has increased over time



We treat B2C/e-commerce shipments as a TDI vertical

- applying the same yield discipline
- using B2C requirements to enhance the overall TDI service and capabilities
- equipping our sales force to effectively sell to e-commerce customers
- engaging in partnerships to grow cross-border e-commerce

We grow B2C profitably because 90% of the KPIs perfectly suit our network

SpD	Volume growth drives better utilization of existing network
WpS	Lower weight per shipment
RpK	Higher RpK related to lower WpS
First mile	More pieces per stop at pickup
Hub sort	Better utilization of existing infrastructure, with high degree of conveyables
Airlift	Better utilization of existing capacity, with lower WpS being advantageous
Last mile	Residential delivery to private households

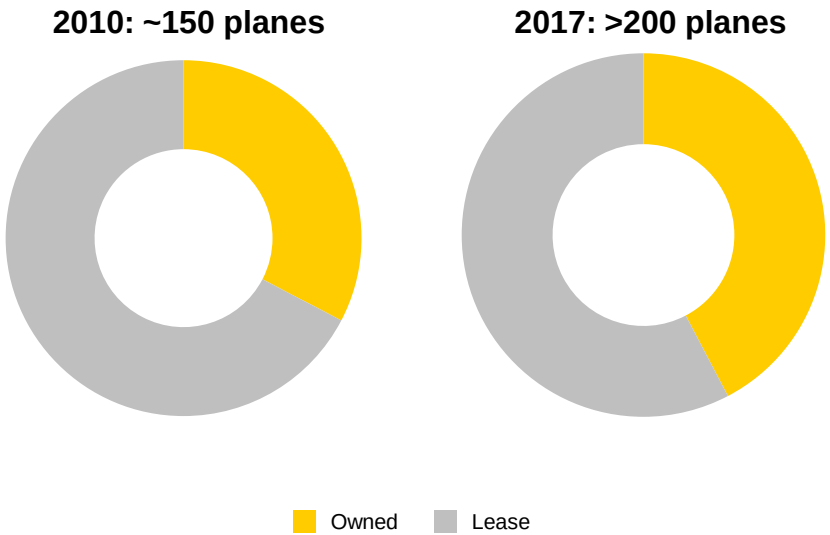
1) Indications based on medium to large B2C customers of top 30 countries

X-Border e-commerce has developed into an important TDI vertical and profitable growth driver

INTERCONTINENTAL FLEET: USE REPLACEMENTS AS OPPORTUNITY TO MOVE TOWARDS HIGHER OWNERSHIP STRUCTURE

Deutsche Post DHL Group

Dedicated fleet (w/o feeders)



2010-17: fleet expansion

- Expansion based on successful virtual airline model – gradual shift in mid-sized, regional segment from leases to ownership
- Today: well balanced fleet regarding ownership and maturity – ownership structure of intercont fleet still more tilted towards leases

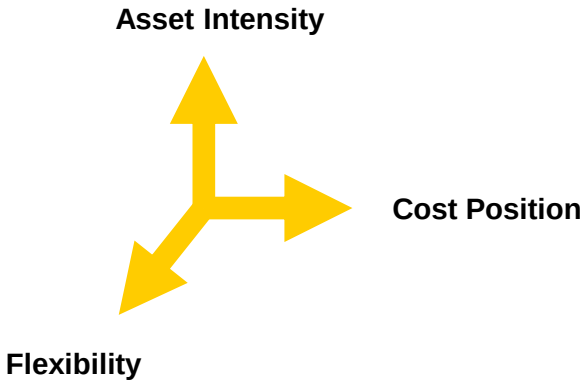
Outlook: intercont replacements by new, owned planes

- Order for 14 Boeing 777s signed, in-line with intentions announced at May CMD – first delivery expected in 2019
- New aircraft are capacity neutral but bring significant cost, efficiency and reliabilility benefits
- Any further fleet expansion to be carefully considered in line with market growth expectations

1. AVIATION NETWORK STEERING APPROACH UNCHANGED – OPPORTUNE TIMING TO SHIFT INTERCONT TOWARDS MORE OWNERSHIP

Deutsche Post DHL Group

How we look on own vs lease:



Significant benefits of Buy vs Lease for intercont replacements

Cost (operation&ownership) – SIGNIFICANT SAVINGS

- Savings reflect lower cost over lifetime & fuel efficiency, driving >50bp margin improvement potential
- Expect EUR ~ 0.2bn incremental capex in FY18
- Financed by separate debt vehicle – no burden on excess liquidity

Asset intensity – NO CHANGE

- No difference in asset recognition under IFRS 16

Flexibility – OPERATIONAL BENEFITS

- Better flexibilty to match supply capacity to demand changes
- Higher reliability and fuel efficiency of new planes are most relevant on intercon fleet given most intense utilization

Using balance sheet strength to unlock further structural Express margin potential

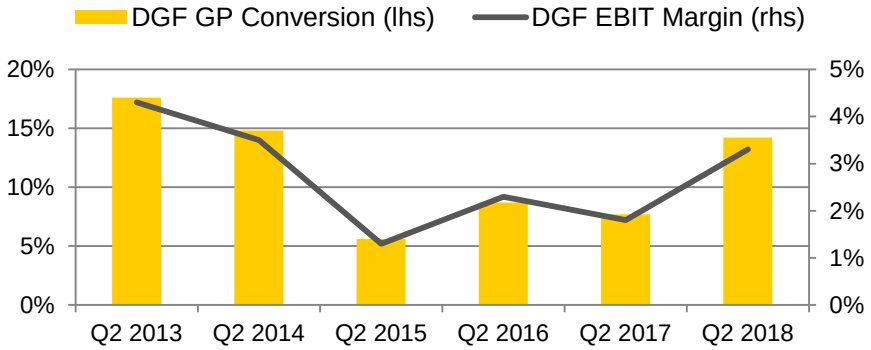
- GP margin DGF up to 23.7%



- Simplify program delivering visible progress
- First countries successfully running on new TMS for OFR, further roll-out continuing smoothly
- EBIT margin and GP conversion trending back toward pre NFE levels

Deutsche Post DHL Group

€ m	Q2 2017	Q2 2018	Chg.	Management comments

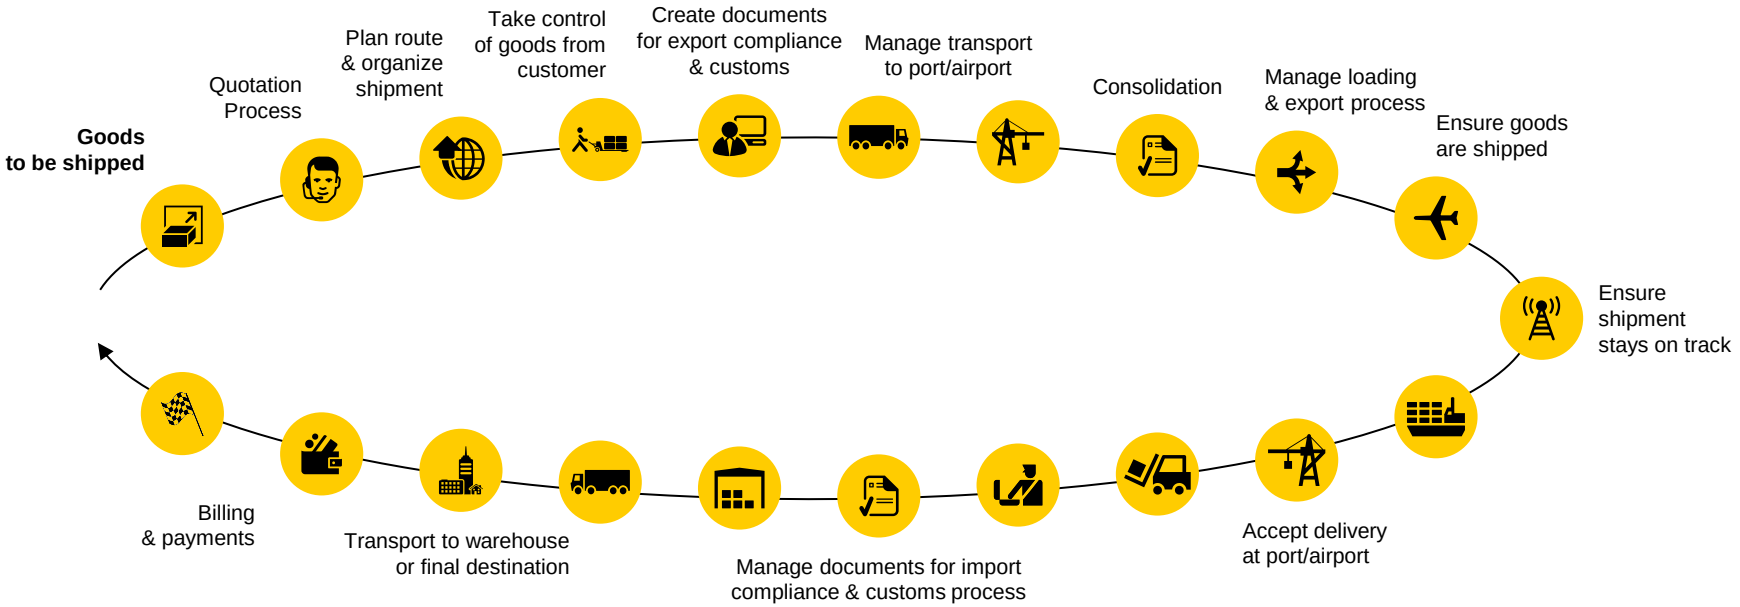
EBIT	67	105	+56.7%	Successful recovery clearly visible in improving operating and financial performance, even despite negative currency impact. Strong margin improvement of ~100bps to 2.8%
Operating Cash Flow	-36	200	>100%	Excl. IFRS16 effect (€ 48m), cash flow improvement reflects strong operating performance and working capital improvements
Capex	19	25	+31.6%	Phasing effects on usual very low capital intensity levels

THE LIFECYCLE OF A SHIPMENT IS A COMPLEX PROCESS

Deutsche Post DHL Group

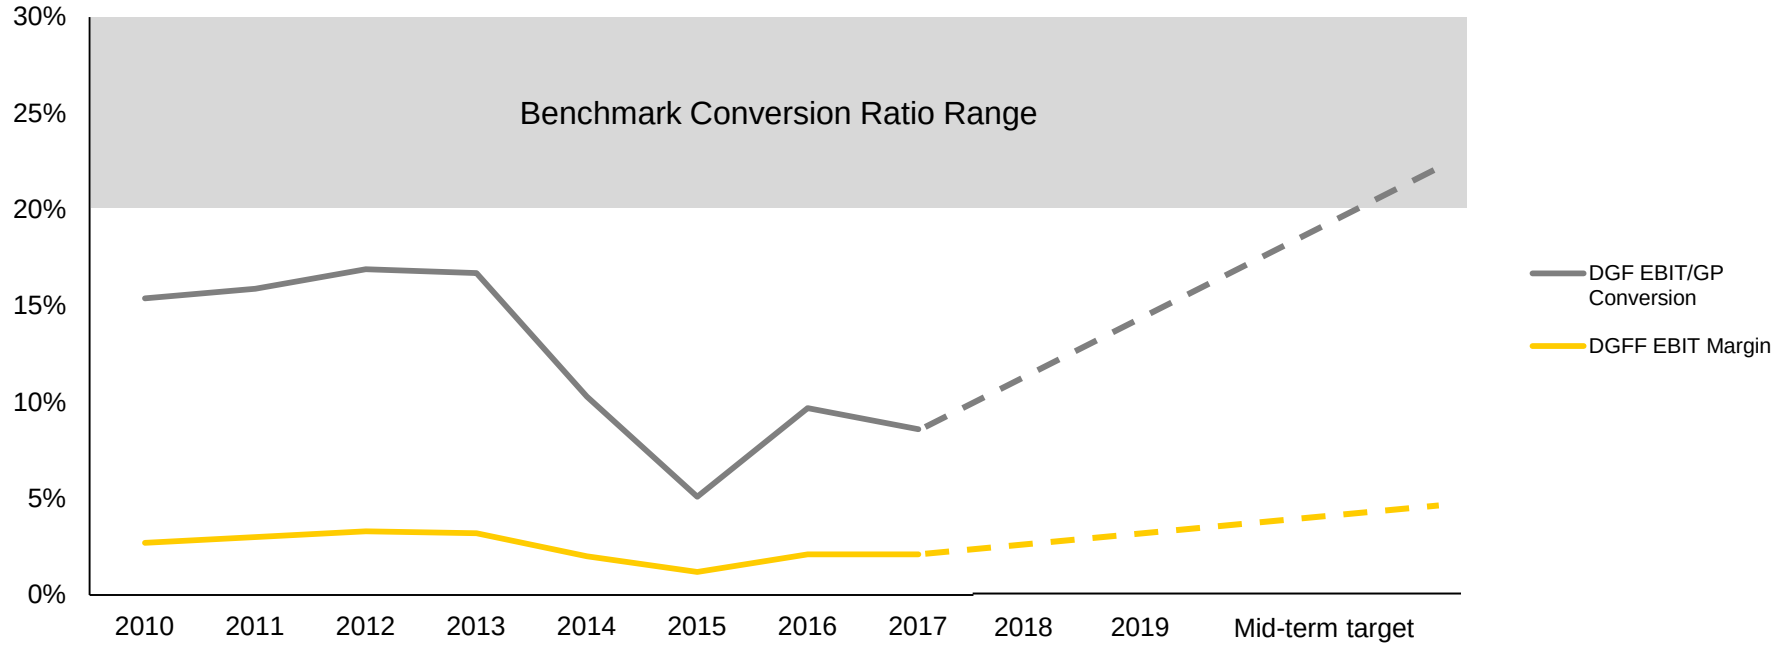
Forwarding is more than brokerage of transport, it is managing all the steps along the way



Success in Forwarding is built on experience, customer relationships, processes and in some aspects, such as consolidation, is also a function of scale

SIMPLIFY STRATEGY AIMS TO CLOSE THE GAP TOWARDS BENCHMARK PROFITABILITY

Deutsche Post DHL Group



No structural barriers – we have the right combination of people, business model, processes and IT renewal to achieve benchmark conversion ratios over time

IFRS 16: MAJOR P&L IMPLICATIONS

Deutsche Post DHL Group

EUR m	Expected IFRS16 effect on 2018[1)]		
Revenue			**No changes**
Materials expense	~ -1,950		Decrease as lease expenses to be recognized as depreciation and interest costs – only exemptions for short-term leases and low-value assets, which stay in material costs
EBITDA	**~ +1,950**		**Increase due to lower materials expenses**
D&A	~ +1,800		Increase due to new depreciation of capitalized operating-lease-assets
EBIT	**~ +150**		**EBIT increase as operating lease expense replaced by depreciation and interest**
Net finance costs	~ -350		Increase due to interest cost component booked in finance cost
Income taxes	~ -50		Lower during first years due to higher deferred tax assets
Cons. net profit	**~ -150**		**Whilst neutral over time, timing effect due to higher interest during first years**

Main P&L effects: increase in EBITDA and EBIT, long-term neutral to net profit

1) Based on leases as per 1.1.2018

IFRS 16: EXPECTED IMPLICATIONS FOR DPDHL GROUP

Deutsche Post DHL Group

Scope at DPDHL Group: >25,000 leasing contracts, covering >35,000 assets

Expected major impacts on 2018 numbers:

P&L	EBIT: expected increase of EUR ~ 150m
Balance sheet	Net debt: Expected increase of ~ EUR 9bn
FCF	FCF: no change based on new definition: OCF – *redemption of lease liabilities* - net capex - net M&A - net interest
Credit Rating	No impact on rating and related metrics expected

Current internal estimates: to be further validated

No effect on actual cash generation and debt rating

EBIT GROWTH IS AND REMAINS THE MOST IMPORTANT FCF DRIVER

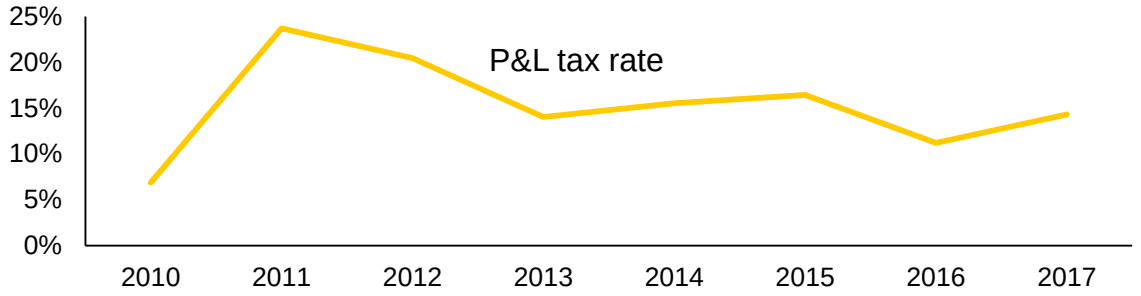
Deutsche Post DHL Group

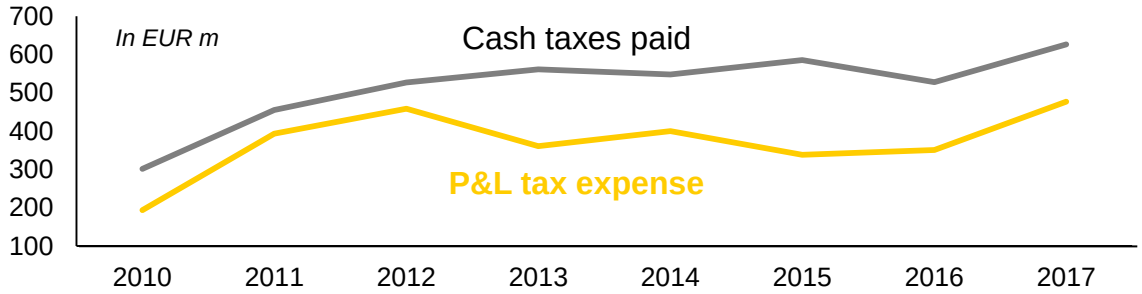
CASH FLOW STATEMENT	EXPECTED TREND	MAIN DRIVERS
EBIT	↗	**Group EBIT guidance, 2020: EUR >5bn**
Depreciation	↗	Step change due to 1st time application of IFRS 16 in 2018, thereafter gradual increase reflecting capex spend
Change in provisions	↗	Total provisions still expected to come further down through net utilization Cash-outs expected to trend flat to slightly down yoy
Working capital	→	Increasing as business grows but strong focus on working capital management
Income taxes	↗	Increase reflecting EBIT growth
Net capex	→	Further modest yoy increases based on growth opportunities, excluding debt-financed Express intercont fleet renewal
Redemption of lease liabilities	→	**NEW** due to 1st time application of IFRS 16 in 2018 (offsetting change in depreciation)
Net M&A	→	Remains opportunistic & bolt-on
FCF	↗	**Expect to generate excess liquidity every year (FCF > dividend payment)**

EBIT increase allows to balance growth investments and rising shareholder returns

P&L TAX RATE AND CASH TAXES PAID EXPECTED TO INCREASE

Deutsche Post DHL Group



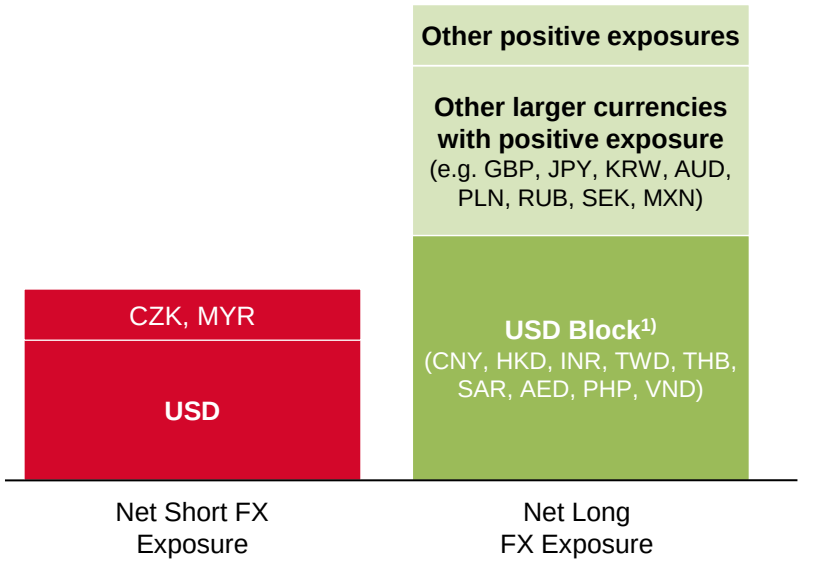


- Main difference between P&L tax expense and cash taxes paid arise from deferred tax assets
- No additional tax loss carryforwards to be capitalized as deferred tax assets in Germany in 2018
- Not yet capitalized tax loss carryforwards amount to EUR 6.4bn, most of it in the US
- Cash taxes paid will increase in line with anticipated growth in profitability

P&L tax rate expected to reach mid-to-high 20% range by 2020

FX MOVEMENTS ARE PART OF BEING THE MOST GLOBAL COMPANY IN THE WORLD

Deutsche Post DHL Group



FX effects are mainly translational

- EUR appreciation => lower revenue and EBIT
- Direct USD exposure actually more than offset by USD-correlated block => USD depreciation = positive stand-alone, but in practice most often offset by FX movements in the USD block
- More than 50% of FX effects in 2017 came from outside of the big currencies

Ultimately, FX volatility is unavoidable and best managed by the business

- We do only opportunistic hedging (e.g. Brexit)
